

EasyTile

EasyTile is a Hygienic Panelling System which is produced from glass fibre reinforced polyester.

The panel itself is easy to fit, cut and drill, and are virtually maintenance free. Discolouration is not a concern, as the grout line is made from the same material.

EasyTile can be manufactured with a Fungicidal gel coat which inhibits the growth of bacteria and fungi, including mould.

EasyTile can therefore provide additional protection in areas such as bathrooms and kitchens where hygiene is paramount.

EasyTiles can also be manufacture to a variety of colours and Fire Ratings which allow them to adapt to any given environment. Plus the installation times are dramatically reduced saving money in the long run.

Applications:

- Bathrooms
- Kitchens
- Hospitals
- Public Changing Rooms
- Public Toilets
- Off Shore
- Rail Industry
- Wash Rooms
- Student Accommodation
